Detailed Action

This is the second Office Action corresponding to amendment filed Mar 9, 2007.

The application contains 18 claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior art in view of Charles et al. (6,66,554). As recited in former Office Action, the admitted prior art disclosed everything but the linear motor. The patent to Charles et al. disclosed that. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have provided the admitted prior art with a linear motor to obtain linear motion.

Allowable Subject Matter

Claims 5-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fitz et al. (5,114,109) and Orino (5,708,535) show other devices of interest.
